

Weld bead remover - BEADex

The new weld bead remover **BEADex** for the first time allows the motorised removal of weld beads from level butt welds as well as seams on 90°-welds as well as folding and bending welds. The broad supporting surface permits safe guidance of the tool. In order to reduce notch effects a small radius is realised when removing 90° weld beads and weld beads from bends.

Comes complete with:

- Extraction connector
- 2x operating tools
- Transport case
- Operating instructions
- "Safety advice" booklet

Technical data	BEADex
	<i>Article no. 24924</i>
Power supply:	230 V 50/60 Hz
Power consumption:	1,050 W
Idling speed:	4,200 – 10,000 rpm
Diameter of extraction connector:	35 mm
Weight (without power cord):	3.1 kg
Conformity mark:	CE
